

ADVERTISEMENT FOR BLOCKCHAIN PROJECT AT THE UNIVERSITY OF HYDERABAD

The University of Hyderabad research team under Professor. Vijaya Bhaskar Marisetty and Dr. Varsha Mamidi leadership developing an integrated "Blockchain enabled cold chain supply chain logistics for Pharmaceutical Industries" Under institution of eminence (IOE) – Sanction order No: UoH-IOE-RC4-21-003. We are planning to recruit 'two' employees with the budget allocated for manpower under this project. The required qualifications, job description and salary for available positions are listed below:

ALL APPLICATIONS SHOULD BE E-MAILED TO : marisetty@uohyd.ac.in

LAST DATE OF APPLICATION: 3rd March 2022

All the appointments are currently meant for a period of 15 months.

1) Blockchain developer:

Salary:

Rs. 50,000/- per month (consolidated) on ad hoc basis.

Responsibilities:

- Participate in the design, development, evaluation, and deployment of decentralized solutions
- Develop, test, and deploy smart contracts across an array of domains
- Develop high-quality code that is maintainable, performant, and accessible
- Brainstorm and help evaluate applications for new tools and technologies as they continually evolve.

Requirements:

- Experience in developing Blockchain applications or proofs-of-concept (POC) using Hyperledger Fabric, Blockchain-based App Development and Token Development.
- Demonstrate a good understanding of Blockchain fundamentals, the blockchain ecosystem, deployment topology and architectures, smart contracts, consensus algorithms.
- Strong understanding and experience in developing, smart contracts, and consensus algorithms.
- Working knowledge of at least one of the Blockchain frameworks such as Hyperledger Fabric, R3 Corda, Ethereum (Solidity)
- Experience in application architecture and API based integration
- Experience in using cloud infrastructure (AWS, Azure) and Linux based platforms like Ubuntu
- Hands-on experience in using any of the following (or similar) languages and DB: Golang, Javascript, NodeJS, CouchDB, mongodb.

2). Android and Web app Developer:

Salary:

Rs. 20,000/- per month (consolidated) on ad hoc basis.

Responsibilities:

- Develop Hybrid apps.
- Maintain performance, quality, and responsiveness of applications.
- Identify bugs in software and devise solutions
- Active role in problem-solving
- Ability to translate Wireframes and PSD Designs into a functional app
- Ability to learn new technologies quickly
- Staying up to date with new mobile technology trends, applications, and protocols
- Writing clean and efficient codes for Android applications, following best practices and conventions
- Designing and building scalable applications from end to end.
- Designing and developing APIs.
- Ability to Deploy applications on servers and quickly debug hosting related issues.
- Ability to translate Wireframes and PSD Designs into functional web apps using HTML5, React.js , Node.js, and Mongo Ability to learn new technologies quickly

Requirements:

- Ability to develop App from scratch.
- Ability to make use of blockchain as backend database
- Experience in react, native or kotlin
- Adept at Android Studio, Responsive UI, Material Design.
- REST API, SQLite
- MVC, MVP, MVVM, MVI is a plus
- At least 1+ years of experience as an Android developer and Web developer
- Knowledge of SQLite database Experience in jetpack components and interest in pursuing new trends in android.
- Familiarity with cloud message APIs and push notifications
- Understanding of Google's Android design principles and interface guidelines
- Basics of firebase.
- Expertise in Complete MERN (Node js, Mongo DB, React js and Express js)
- Strong analytical and problem-solving skills
- Experience in managing server infra in AWS/GCP
