Traffic Advisory to the campus community

Subject: Key Road Safety Regulations for a Safer and Healthier Campus Environment.

In view of the growing concerns related to road safety, environmental pollution, and public health hazards within the University premises, all campus residents, staff, students, and visitors are hereby informed of the following mandatory road safety regulations. These measures are aimed at fostering a secure, noise-free, and healthy environment for all:

- The use of modified vehicle silencers and pressure horns significantly elevates noise and air pollution, posing serious health and safety risks. Modified silencers and high-decibel horns are strictly prohibited. Only authorized silencers are permitted on campus.
- All vehicles must strictly adhere to the speed limit of 30–40 kmph within the campus to ensure pedestrian and cyclist safety.
- Triple riding on two-wheelers and double riding on bicycles are strictly prohibited, as overloading compromises vehicle control and significantly increases the risk of accidents.
- All two-wheeler riders and pillion passengers must wear helmets without exception. Helmet use drastically reduces the risk of severe head injuries and saves lives.
- Strictly avoid mobile phone use while riding or driving on campus. Mobile phone usage while operating a vehicle causes dangerous distractions and significantly increases accident risk.
- Children below 18 years of age are not permitted to drive any two- or four-wheeled motorized vehicles inside the campus. Driving by minors is unsafe, illegal, and will be dealt with seriously. Any such instances will be reported to guardians and appropriate action will be taken.
- Horn usage is banned near schools, hostels, administrative buildings, and departments to maintain a peaceful academic and residential environment. This rule is essential to minimize stress, reduce noise pollution, and enhance the overall well-being of students and staff.
- All campus residents are requested to strictly follow the above regulations. These steps are not only critical for legal compliance but also vital for public health, safety, and the quality of life within the university environment.
- The vehicles should be parked at their respective schools/ departments / offices only. Unauthorized Vehicles parked at beyond hours appropriate action will be initiated.

Your cooperation is solicited in making the University of Hyderabad a model of responsible and safe campus living.
