

## Capacity Building Workshop-II

### Two Days Workshop on Mixed method approach and importance of qualitative Research Under IOE Project 'Health care needs and practices in Indian men and women with Reproductive System cancer'

(UoH/IOE/RC1/RC1 20-030)

University of Hyderabad

Date of workshop: 19-20<sup>th</sup> May 2022 (10:00 am to 5:30 pm)

#### About Us

The Centre for Health Psychology, School of Medical Sciences, is the first ever Centre in Health Psychology in the Country established in 2007. The Centre offers Integrated MSc Health Psychology, MSc Health Psychology and Ph.D. Psychology. The Centre has faculty with a research interest in several areas of Health Psychology. The present project covers one such area in health research, which is psycho-oncology.

The School of Management Studies (SMS), commenced functioning from May, 1999. It offers a two-year full-time MBA Programme, MBA programme in Health Care and Hospital Management, MBA programme in Business Analytics and a Ph.D. programme in Management Studies. It promotes faculty and doctoral research, consultancy, training, and outreach activities in various sectors. The present project combines health psychology and health management in the area of cancer care.

#### About the Workshop

Research methodology plays a vital role in shaping the research process and outcome. Knowledge and understanding of research methodology helps the researcher select an appropriate research method. The present workshop is the second research methodology workshop of the series, which progressively would focus on applied research methodology. The workshop intends to cover mixed method approach, qualitative research, data collection methods, analysing the qualitative data, and the latest software for data analysis. Participants will learn and practice with experts during the workshop.

#### Who can attend?

This workshop is for Ph. D researchers and scholars working in behavioural sciences, healthcare studies, and social sciences. Participants will be engaged in hands-on experience, and interaction with various expert resource persons in all the topics covered during the workshop.

#### Expected Outcome

After attending the capacity building research methodology workshop II, the participants will know or understand significance of mixed method approach, relevance of qualitative research methods, sampling procedure, and data collection methods. The participant will learn progressively through the series of workshops various software features in the narrative and content analysis of the data. Upon completing the series of workshops, the participants will also be familiar with thematic analysis, content analysis, grounded theory, discourse analysis and framework analysis.
