The School of Management Studies (SMS) commenced in May 1999. It offers a two-year full-time MBA Programme, an MBA program in Health Care and Hospital Management, an MBA program in Business Analytics, and a Ph.D. program in Management Studies. It promotes faculty and doctoral research, consultancy, training, and outreach activities in various sectors. It runs a program on Healthcare Management. The present project combines Health Psychology and Health Management in the area of cancer care.

## ❖ **About the Conference**

---

Innovations in health interventions are the key factors to promote health care needs of individuals and community.

Indigenous people are the holders of unique languages, knowledge systems, and beliefs and possess invaluable knowledge of practices for the sustainable management of natural resources. A traditional, complementary and alternative system is a natural form of medicine outside the system of Western or allopathy medicine practiced by the majority of doctors all over the world today. Traditional systems and health innovations have existed since time immemorial, but few of them have been developed into full-fledged working systems. Such systems are based usually on a holistic concept that includes physical, social, emotional, cultural, and spiritual well-being, for both the individual and the community. In India healthcare systems advocating traditional practices of health are well known and well received.

## ❖ **Objectives of the Conference**

---

The objective of this Conference is to bring together researchers and experts from Health Sciences and other disciplines to showcase disciplinary and interdisciplinary research on promoting health using practices in respective areas.

1. Recognize the best practices for psycho-social determinants of health.
