

National Workshop on BEHAVIOURAL AND BRAIN HEALTH IN AGEING

“COGAI-T-FOR FALL AND DEMENTIA RISK PREVENTION”

18th-19th October 2024

OVERVIEW OF THE WORKSHOP

The world's population is ageing. Social and demographic transitions result to swift growth in ageing population across the world and India too witnesses similar demographic shift and its associated challenges. Cognitive declines, gait abnormalities, fall risk, dementia and depression are closely interlinked with increasing age, which demands the need for the development of accessible, affordable and efficient interventions for cognitive and functional health at primary and community level for early identification and management to combat impact of growing neurodegenerative disorders, injury and disability burden.

The Two-day National workshop aims to provide a platform to discuss the contemporary issues in the area of ageing-health, falls and dementia risk prevention, management with inter-disciplinary professional networking among academic and clinical experts working in the area of ageing. Facilitates hands on training of functional and cognitive assessment, knowledge exchange on innovative approaches and best practices in functional, nutritional, cognitive and psycho-social perspectives for healthy ageing by national and international experts.

THEMES

1. Preventive approach to Falls, Dementia and Alzheimer's disease
2. Aging in Place-Socio Demographics, Public and Policy Perspectives
3. Technology-based fall prevention programs
4. Complimentary approach to Gait and Cognition
5. Physical, Social-health care environments in Fall risk
6. Loneliness, Mental health in Ageing population
7. Nutrition and Dietary Strategies for Healthy Aging

IMPORTANT DATES

Registration opens:
05.09.2024
Abstract/Poster Submission
deadline: 05.10.2024
Notification of acceptance:
12.10.2024
